

ABSTRACTS

Most abstracts contain the following parts:

- ▣ Background
- ▣ Aim
- ▣ Method
- ▣ Results
- ▣ Conclusion

INTRODUCTIONS

Parts:

- Opening strategy
- State the subject: Describe the project: who, what, when, where, why, how
- State the purpose: Foreseen & unforeseen problems, Relevance
- State the scope: Negative impacts to be discussed.
- Preview the development of the subject: How information was gathered, then analyzed, then discussed, the conclusions and recommendations

PARAGRAPHS

Every paragraph should be:

- **Unified** - The sentences should all refer to the main idea, or thesis, of the paper.
- **Coherent** - The sentences should be arranged in a logical manner and should follow a definite plan for development.
- **Well-Developed** - Every idea discussed in the paragraph should be adequately explained and supported through evidence and details that work together to explain the paper's controlling idea. Also, a well developed paragraph moves **from the more general level** of the topic sentence **to the most specific level** of the unique: vivid, pertinent details (and the proper name or date, if applicable) about the particular person, event, animal, or thing that you are writing about.

TBSIR Paragraph:

T (Topic)

B (Bridge)

S (Support)

I (Interpretation)

R (Return)

Topic sentence: The topic sentence is usually the first sentence in a paragraph. It introduces the main idea of the paragraph. Summarize the main idea of your paragraph. Indicate to the reader what your paragraph will be about.

Bridge: Usually, it is the second sentence in your paragraph. It makes a transition from the topic to the specific details. Decide how your support is related to your topic, and what the focus of your paragraph is.

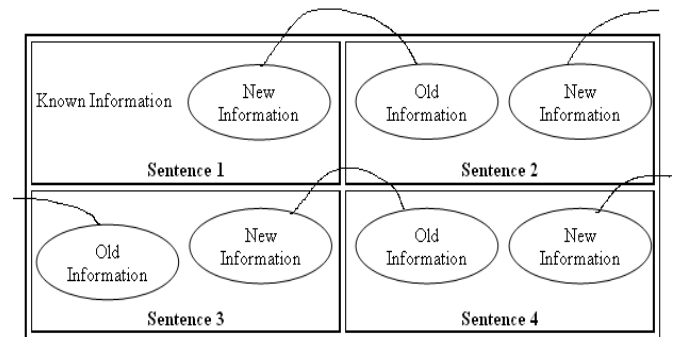

Support: They come after the topic sentence, making up the body of a paragraph. They give details to develop and support the main idea of the paragraph. You should give supporting facts, details, and examples.

Interpretation: This comes after your support. Give the reader extra information that they may not think of by themselves. How would you interpret your facts? What is your opinion? What conclusions can you draw?

Return: (optional) The return sentence is the last sentence in a paragraph. It restates the main idea of your paragraph. Restate the main idea of the paragraph using different words.

COHERENCE

Old-new Information:

Word Chains: You can connect ideas more clearly by using key words that are related to each other throughout a paragraph (repeat key words, restate the main point of the thesis)

How is this done? Repetition, Synonyms, And more!

Transition between paragraphs: write sentences that directly link the end of one paragraph to the beginning of another.

SENTENCES TYPES

Simple: Subject + Verb + Object

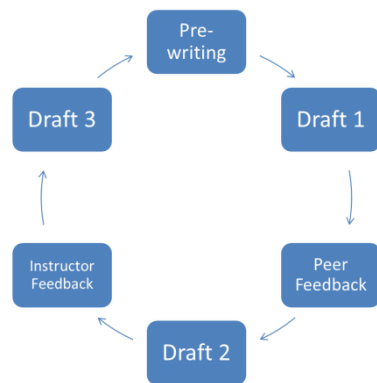

Compound: Subject + Verb + (Object),
FANBOYS Subject + Verb + (Object).

F or
A nd
N or
B ut
O r
Y et
S o

Complex: Main clause + Dependent Clause

Compound-Complex: consist of complex sentence connected to a main/independent clause.

WRITING PROCESS

Pre-writing: Reading, Discussing, Brainstorming, Listing, Freewriting/quickwriting, Journalist questions (who, what, when, where, why, how), Clustering/mindmapping

SUMMARY

Characteristics of a Good Summary

- Include a reference to the author, title, & main idea of the article in the first sentence.
- Give the main supporting ideas.
- Omit unimportant details.
- Use your own words; no plagiarism; no quotation.
- Use reporting verbs.
- Do not include your own opinion.

CONCLUSIONS

It brings the essay to a close. It restates the ideas from the body paragraph. It does not introduce new ideas.
